---

San Diego State University - San Diego, CA *Expected May 2027*
Bachelor of Science in Aerospace Engineering | Minors in Mathematics & Computer Science
Undergraduate Research in Advanced Energy Systems: Electrochemical Energy Lab — Dr. Lingping Kong

---

PROFESSIONAL EXPERIENCE

SUPPLIER DEVELOPMENT ENGINEER INTERN *05/2026 to 08/2026*
SpaceX - Hawthorne, CA

- Owned technical decisions for Starship flight hardware on a confidential development program: DFM, sourcing, manufacturing, and supplier selection.
- Conducted on-site supplier audits to establish quality expectations and assess manufacturing capability.
- Led root-cause analysis on out-of-tolerance conditions and other nonconformances, driving corrective actions both internal and external to closure.
- Identified a recurring gap between design engineering and supplier expectations, and developed a standardized review process adopted by supplier development, quality, and design engineering teams.
- Resolved critical part shortages to keep production on schedule, while coordinating experimental assembly procedures for development testing in parallel.

INTEGRATED MANAGEMENT SYSTEM INTERN *06/2023 to 08/2023*
NASA - National Aeronautics and Space Administration - Merritt Island, FL

- Managed and streamlined documentation workflows for NASA's Integrated Management System team.
- Maintained internal web applications for document control and governmental compliance audits.
- Authored and revised technical memos, data sheets, and procedural updates improving efficiency by 10%.
- Developed updates, data sheets, technical instructions, and action plans for NASA.
- Earned 8 NASA certifications in process management and technical documentation.

EV SYSTEMS ENGINEER *02/2026 to PRESENT*
The Thermal Club - Thermal, CA (contract)

- Designed and built a custom low-voltage wiring harness for full-vehicle integration.
- Programmed and calibrated the motor control unit and digital dash for real-time telemetry.
- Built and tested high-voltage battery packs, including cell validation and BMS configuration.
- Owned the electrical conversion end-to-end, from component selection through final commissioning.

LEADERSHIP EXPERIENCE

PRESIDENT | ENERGY STORAGE TEAM LEAD *07/2023 to 06/2026*
Aztec Electric Racing (AER) FSAE EV - San Diego, CA

- Leading a 250+ member FSAE electric team in project management, operations, and budget planning.
- Established the team's first operations framework to delegate work in SAE competition requirements, sponsorships outreach, safety, and recruitment.
- Researched, designed, and fabricated first high voltage tractive battery with control systems integration.
- Achieved a historic first by successfully passing the accumulator structural inspection.
- Built and iterated the team's first powertrain testbench with cooling loop and wiring harness integration.
- Developed documentation and validation standards for future subsystem designs and manufacturing.

FOUNDER & PRESIDENT *07/2024 to PRESENT*
Muslim Tech Collaborative (MTC) - San Diego, CA

- Founded and scaled a professional development network for Muslim students from the ground up, growing to 30+ active members.
- Directed all club operations including organization, outreach, marketing, recruitment, and funding strategies.
- Secured funding and partnerships with employers to host professional panels and career workshops, connecting students directly with industry professionals.

SKILLS

Management: Supplier Auditing & Quality Assessment · Root Cause Analysis (8D) · Program/Project Management · Supply Chain Logistics · Budgeting & Cost Reports · Cross-Functional Leadership ·
Engineering & Manufacturing: High-Voltage Battery & BMS Design · Battery Validation & Testing · Machining & Fabrication · Circuit Analysis & Wiring Harness Design · GD&T · DFM · Automotive/EV Systems Integration
Software & Tools: NX / Teamcenter · Solidworks · ANSYS FEA · MATLAB & Simulink · Python / C / Java
